

Business Plan 2012 Strathcona County & Budget

Flagged Items

During presentation of the business plan and budget, Council provides administration with critical input into the final product. Two very valuable methods of providing this input are:

1. Flagged Items, and
2. Information Requests

Flagged Items

- An issue is raised by a Councillor during the business plan and budget presentations
- The presenter does not have the response at hand
- The issue is deemed critical by the Councillor to making the final budget decision
- A vote is taken by Council to determine if there is support for the flagged item
 - If a majority of Council votes in favour of the flagged item, administration will provide a response to Council before the conclusion of the budget deliberations
 - If a majority of Council does not support the flagged item, the issue is deferred

Information Requests

- An issue is raised by a Councillor during the business plan and budget presentations
- The presenter does not have the response at hand
- The issue is **not** deemed critical by the Councillor to making the final budget decision
- No vote is required
- Administration will provide a response to Council as soon as practical
