

# Early communities of Strathcona County

This map highlights some of the names of early districts in Strathcona County. Eight of these developed into rural hamlets that are well established today. Others are small locales known mostly to longtime residents and remembered as the name of an old school, post office, store or railway stop.

The larger lightly shaded area indicates the Beaver Hills, an important ecosystem in the region that encompasses a significant part of the south and east portions of the County.

Beaver Hills
