

# RPC - Activity booking time poll

---

December 15, 2020

# Purpose

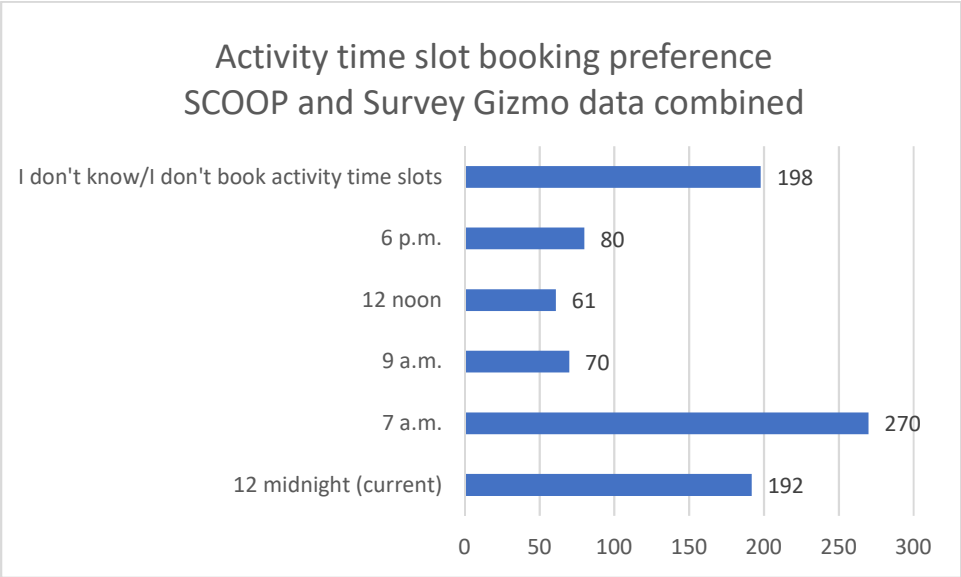

---

In early 2020, Recreation Online was launched as a new online registration system for Recreation, Parks and Culture programs. As a result of the pandemic, pre-booking of activity timeslots was put in place using Recreation Online to manage new capacity limits on previous drop-in recreation activities. A default activity booking time of 12 midnight was the only option to release recreation booking timeslots to the public. A recent upgrade of the Recreation Online system now allows for the activity booking time to be adjusted.

A one question poll was shared with the public in order to determine the optimal time the system should open for activity bookings. Below are the results of the poll.

## Online poll results

Question: We are currently reviewing the timing of this process. As such, which of the following is the ideal time to open time slots for booking activities, such as lap swimming and wellness centre times, using Recreation Online?

## Online poll results

The Activity booking time was changed to reflect the poll results.
